Blue-Green Algae Update

We have just received the results of another Blue/Green Algae test. These are from water samples taken earlier this week.

Although the levels of blue-green algae concentration have reduced (particularly in the middle of the lake where it has roughly halved) they are still far above the WHO's no swimming threshold.

The warning signs will remain out for you to read.

Please continue to follow the RYA advice. The link for more information and explanation of the risks is below:

<https://www.rya.org.uk/knowledge/environment/dealing-with-blue-green-algae>

Piddinghoe Build

-

Attached is another sheet of photos of the Stage 1 build at Piddinghoe, the new storage facility.

We have been asked how, as members, may we help. The build team will ask for help when they need it – Thank you.

In the meantime you can help by keeping the site tidy, cleaning down the kitchen, packing everything away neatly and tending your berths. This will allow the Piddinghoe Team to concentrate on the build. Thank you again for all the offers of help.

By Michelle Smith on behalf of the Piddinghoe Mgt Team
